Bar Scan[®] Asset Manager

Instructions to Upgrade to Bar|Scan[®] Version 3.5.0

POST: Bar|Scan, Inc. 4607 Lakeview Canyon Road, Suite 596 Westlake Village, CA 91361-4028 USA US TEL US FAX INTERNET EMAIL (805) 777-0079 (805) 777-0054 http://www.barscan.com techsupport@barscan.com

Upgrade Instructions—You will NOT need Windows Local Admin Rights to perform this upgrade.

Before installing, make sure that all other users are logged out of Bar|Scan and all ODBC linking (to web sites, etc.) is disabled. It is not necessary to uninstall the previous Bar|Scan program. If you get a message during the install that any BarScan files (program, fonts, dlls) are in use by other computers, you may need to log these users out or reboot them to unlock these files.

For Bar|Scan version 3.4.0 or greater:

On our website, select the first link on the page "Bar|Scan

(3.5.0 executable files only)" which contain the latest version

of Bar|Scan. After downloading, click on the file to begin the installation process. These instructions assume that you are currently using Bar|Scan version 3.4.0 or newer.

For Bar|Scan version 3.3.9 or older:

On our website, select the second link on the page "**Bar**|**Scan Program Upgrade** (3.5.0 complete **upgrade**)" which contain the latest version of Bar|Scan. After downloading, click on the file to begin the installation process. These instructions assume that you are currently using Bar|Scan version 3.3.9 or older.

When you are completed with the upgrade, start BarScan and verify the version number on the Bar|Scan Sign On Screen, it should display Version 3.5.0. Then login to Barscan. You MUST perform a Table Integrity. To open the Screen, from the Bar|Scan Main Menu select File-> Company-> Housekeeping-> Table Integrity. During the Table Integrity, you may be prompted to allow Bar|Scan to create new Tables, respond YES.

For licensing Android or iOS devices, please call or email for instructions to techsupport@barscan.com
